

As a single citizen of the US I oppose the most recent ruling any company in any way to dominate both the tv and newspapers media....

For our country to be able to exercise and encourage each individual citizen to express their views, these majority of these citizens much have the right to have access and be exposed to fair objective news reporting. When the media is owned becomes a tool for the political interests of those in power, which is rapidly moving in that direction, brainwashing the common man. we will lose the grace that God gave this country, and become no different than the totalitarian countries.
